

**Your loyal companion thanks you!**

If you're like most of our customers...

You and your dog are going to love the Lautus Pets® raincoat!

The first thing you'll notice is that your dog's raincoat comes in a simple, recyclable plastic bag to keep the packaging to a minimum and reduce the strain on our environment while protecting the coat on its journey to you. Just put it and the glossy insert in with the rest of your recycling.

Here are some suggestions from us and your fellow customers about how to make the most of your new coat:

- Use the rear leg straps to keep the back of the coat in place on your dog, especially if your dog is active or it's windy.
- Your coat comes with a hole at the back of the neck, for the leash to attach to a neck collar worn by your dog.
- If you prefer using a harness, consider putting the harness on top of the coat instead of under the coat.
- Close the neck Velco first being sure it's comfortable for your dog before closing the chest straps.

**The following are ways to keep the raincoat looking like new:**

- Apply a standard fabric waterproofing spray if it starts to be less waterproof.
- Wash it separately in the washing machine with a low temperature (maximum 85F / 30C).
- Tumble dry it with a cool/low heat, if desired.
- If you wish to iron it, use a low setting.

We hope you find the above helpful. If you have any suggestions on how we can improve the raincoat or any questions, please make sure to get in touch by visiting the [Lautus Pets web site](https://www.lautus-pets.com) or [emailing\\_support@lautus-pets.com](mailto:emailing_support@lautus-pets.com).

Sincerely,  
Jay  
Founder of Lautus Pets®
